[CMD2020 The Camera-Ready Submission System](#) ←

Dear authors,

Several authors have written to CMD2020 asking for the extension of full paper submission. To respond to these requests, the organizing committee has decided to extend the deadline for the full paper submission to the 13th July, 2020.

Besides, the IEEE reserves the right to exclude or remove a paper from IEEE Xplore® if the paper is not presented at the virtual conference.

Sincerely yours,
Norasage Pattanadech
Chairman of CMD 2020,
King Mongkut's Institute of Technology Ladkrabang

8th International Conference on Condition Monitoring and Diagnosis (CMD 2020)

We cordially invite you to submit papers to the eighth International Conference on Condition Monitoring and Diagnosis (CMD 2020) that will be held at Electrical Engineering Dept., Faculty of Engineering, King Mongkut's Institute of Technology Ladkrabang, Bangkok, Thailand during the period October 25-28, 2020. CMD provides an excellent opportunity to academics and experts to discuss and to share ideas, results as well as experiences on electric power apparatus monitoring, fault diagnosis and asset management. The conference is organized by the Department of Electrical Engineering, Faculty of Engineering, KMITL, Thailand and Electrical Engineering/Electronics, Computer, Telecommunications and Information Technology (ECTI) Association, Thailand. The conference is technically supported by the IEEE Dielectrics and Electrical Insulation Society and the IEEE Power and Energy Society Thailand Chapter.

The proceeding of CMD2020 will be included in IEEE Xplore and be indexed by SCOPUS !

Organized by

IMPORTANT DATES

Deadline of Abstract Submission
~~January 31, 2020~~
March 9, 2020

Notification for Authors
April 20, 2020

Paper Submission
~~June 22, 2020~~
July 13, 2020

Notification of Paper Acceptance
August 10, 2020

Deadline of Camera Ready
~~September 25, 2020~~
October 2, 2020

Registration Deadline
~~September 25, 2020~~
October 2, 2020

Conference Dates
October 25 - 28, 2020

Conference Topics

- Evaluation of failure and degradation of power equipment based on CMD
- Advanced sensors and diagnosis techniques for Smart Grid
- Strategy planning and asset management for power equipment
- Application of Big data and IoT on condition monitoring and diagnosis
- New trends in insulation structure and design
- Degradation and operational life assessment of power equipment, renewable energy conversion systems and energy storage
- Low voltage insulation design, testing, monitoring, and diagnosis
